

How to Make Your Mini-Book

One sheet.
Seven steps.
A real little book.

YOU'LL NEED 1 sheet of paper (your printed mini-book) · scissors

----- fold line — ✂ cut line

1 Print the mini-book page. One sheet, single-sided, actual size — turn off “fit to page” so the panels stay even.

2 Fold in half the long way. Crease firmly, then open it back out.

3 Fold in half the short way, then in half again. Crease each fold well.

4 Open it out flat, pictures up. The fold lines divide the sheet into eight panels — the solid line in the middle is where you'll cut.

5 Fold in half the short way again, then cut along the middle crease — through both folded layers. A grown-up job: start at the folded edge, stop at the next fold line.

6 Open it out, then fold the long way again, pictures facing out. Hold each end and push in towards the middle — the cut opens into a diamond.

7 Keep pushing until the panels make an X, then wrap the pages round so the cover is on the front. Crease everything flat — you're done!
